GUI student view - How lectures are presented

The raise hand icon will open a window, it can tell the teacher whether they are progressing slow or fast. If you clicked it by incident, choose normal.

As a user, I think it would be good to limit the maximum character length for question titles, say, max 128 char. length. So that it would be nice to read and well formatted. Also, username length should also be limited. What do you think?

EDIT: I agree!
